DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claim(s) 29-42, drawn to a component.
- Group II, claim(s) 43-48, drawn to a method of assembling a device.
- Group III, claim(s) 49-56, drawn to a process for manufacturing components.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature, the component requiring notched corners with metallized lands set back from the transfer face of the component, has been found to not provide a special technical feature over the prior art. Suehiro et al. (US 6,834,977) and OOMori et al. (US 20003/0081289) both disclose the special technical feature. '977 discloses the special technical feature in figure 4 and '289 discloses the special technical feature in figure 5a.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 4162

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
